Uncover one's life potential

In Chinese Metaphysics, time is circular:
Better Preparation for the Upcoming Year!

The destined path of your life.

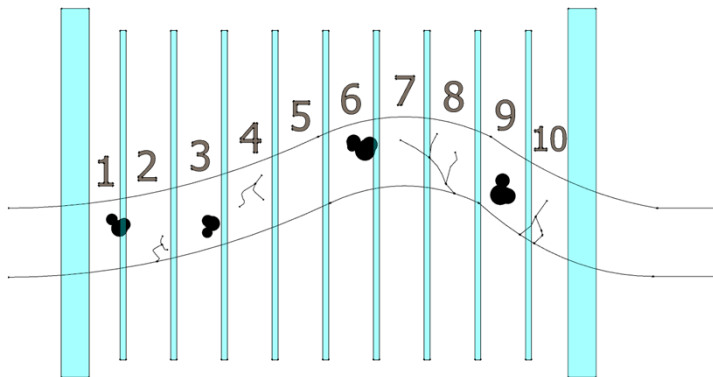

Analogy: When you are travelling by car, you may encounter 10km highway, another 10km smooth road with sharp turns, then another 10km straight broken road that can slow you down, etc.

Like the roadway with its turns and different surfaces, our lives tend to unfold in similar kinds of phases. Luck cycles show the changes of the cosmic energy that defines one's luck in 10 year interval.

If two continuous unfavorable luck cycles arrive, it does not mean every year in 20 years is unfavorable.

Cosmic energy also changes annually.

When a supportive annual cosmic energy arrives, it can offset the effect of the ongoing unfavorable luck cycle.

On the other hand, life can be slower if a favorable luck cycle is offset by unfavorable annual luck.

By understanding one's energy flow and going with it, life will be smoother. Upcoming years can be prepared well in advance.

Third 10 Years

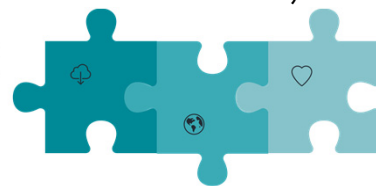

The caveat ...

Although BaZi can read the life destiny [Heaven Luck], one's destiny can't be changed.

We can clear up our path [Earth Luck] by utilizing Feng Shui.
